ABPath Subspecialty Preparation Curriculum

Preparation across the eleven ABPath subspecialty certificates, aligned to the official exam blueprints and taught from US sign-out experience.

Curriculum · August 2026

Pricing is quoted per candidate. Request a quote at mendelacademy.com

UNITED STATES · SUBSPECIALTY BOARDS

ABPath Subspecialty

Preparation across the ABPath subspecialty certificates — aligned to the official exam blueprints and taught from real US sign-out experience. Deepest coverage in Hematopathology, Molecular Genetic Pathology, Cytopathology and Dermatopathology.

Included

- Qbanks aligned to ABPath subspecialty blueprints
- Digital slide, flow cytometry and molecular case libraries
- Onion Skin Technique for complex case stems
- Hybrid mentorship from US-experienced faculty
- Exam-strategy and pacing coaching

The eleven ABPath subspecialties

ABPath issues subspecialty certificates in eleven areas. Three are administered jointly with another ABMS member board — for those, application still goes through ABPath.

Blood Banking / Transfusion Medicine

Blood supply safety, donor and recipient care, and transfusion practice.

Chemical Pathology

Interpretation of laboratory chemical and biochemical analyses for diagnosis.

Clinical Informatics

Information and communication technology applied to patient care and health systems. **Joint with ABPM.**

Cytopathology

Diagnosis from cellular samples and fine-needle aspirates.

Dermatopathology

Microscopic diagnosis of cutaneous and skin-related disorders. **Joint with ABD.**

Forensic Pathology

Sudden, suspicious and violent death, via autopsy and toxicological correlation.

Hematopathology

Disorders of blood cells, bone marrow and lymph nodes.

Medical Microbiology

Isolation and characterization of bacteria, viruses, fungi and parasites.

Molecular Genetic Pathology

DNA/RNA-based testing for inherited and acquired genetic disorders. **Joint with ABMGG.**

Neuropathology

Central and peripheral nervous system and skeletal muscle disease.

Pediatric Pathology

Disease processes unique to fetuses, infants, children and adolescents.

Subspecialty list per the American Board of Pathology. Verify current requirements and deadlines at abpath.org before applying.

HOW WE TEACH IT

The method

These four components run through every Mendel track and are what separate our preparation from passive video courses and question grinding.

Onion Skin Technique

Layered dissection of MCQ stems and cases — peeling each distractor back to the reasoning that generated it, so recall survives exam pressure.

Mendel Chitras

Visual mnemonics built for recall under time constraint, used heavily for syndromes, marker panels and classification systems.

Hybrid mentorship

Scheduled contact with faculty who have sat and examined these papers. No candidate prepares alone or guesses at reporting standards.

Candidate community

Access to a cohort of candidates and alumni who have cleared the same exam, for case swaps, mock vivas and the practical logistics.

Other Mendel tracks

Each track has its own curriculum document. Ask us for any of these, or download them from the board preparation page.

Track	Region and format
FRCPPath Part 1	UK · Written
FRCPPath Part 2	UK · Practical
NEET-SS Pathology	India · Entrance

NEXT STEP

Request a quote

We do not publish a single price list. Fees depend on the specialty you sit, how long you need access, and how much one-to-one mentorship you want. Tell us where you are in your preparation and we will send a written quote.

What we need from you	Why it changes the price
Specialty within the track	Slide libraries and faculty differ per specialty
Target sitting date	Determines programme length and revision intensity
Attempt history	Repeat candidates get a diagnostic and a narrower plan
Mentorship level	Group teaching versus one-to-one case review
Cohort or individual	Institutional and group rates are quoted separately

Request your ABPath Subspecialty quote

Use the quote form on the board preparation page, or email us with the five details above and we will reply with a written quote and a recommended start date.
